-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 May 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☐ Claim(s) _____ is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-31 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Art Unit: 2122

DETAILED ACTION

Examiners Response

This Office Action is the response to the communication received on May 28, 2003 Amendment under 37 CFR § 1.116. Reconsideration of the instant application is requested by applicants. All such supporting documentation has been placed of record in the file. Claims 1-31 are pending in this application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by US 2002/0100030 A1, Souloglou et al.

With regards to Claims 1, Souloglou anticipates emulating the execution of a target program comprising instructions of an instruction set of a target computer on a host computer having a different instruction set, said method comprising (col.1 [0005]); performing a static translation of the instructions of the target program into a series of instructions of an intermediated instruction set, the intermediate instruction set being optimized for interpretation on the host computer (col.1 [0005]); executing the series of instructions of the intermediate instruction set by interpretation on the host computer (col.1 [0005]).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15,18-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 2002/ 0100030 A1, Souloglou et al. as applied in claim 1, in view of Horwat USPN 6,021,275.

With regards to claims 2 & 27, Souloglou discloses all the claimed limitations as applied in claim 1. Souloglou doesn't explicitly disclose wherein the intermediate instruction set comprises a plurality of control words that are derived, at least in part, by mapping control words of the instruction set of the target machine into the fundamental word size of the host machine. However Horwat does disclose this feature (21:62-67 to 22:1-5). Therefore it would have been obvious to one of ordinary skill art at the time the invention was made to combine Souloglou with Horwat because, mapping instructions from a host to a target system is a general practice during translation or interpretation and makes translating more efficient.

With regards to claim 3, according to claim 1, wherein the intermediate instruction set comprises a plurality of control words that are derived by redefining control words of the target computer to minimize the number of masking and shifting operations needed to decode the plurality of control words of the intermediate instruction set (21:62-67 to 22:1-5, also see 20-25 for word contained in each record).

With regards to claim 4, according to claim 1, wherein the intermediate instruction set comprises a plurality of different types of control words having formats defined to minimize the time needed to determine the type of a control word (20:45-63).

With regards to claim 5, as recited in claim 1, wherein the intermediate instruction set comprises a plurality of controls words derived from control words of the instruction set of the target machine in a manner that reduces the number of different forms of control words in the intermediate instruction set (24:28-35).

With regards to claim 6, as recited in claim 1, wherein a code structure of the intermediate instruction set comprises code words have a fixed length that matches the fundamental word size of the host machine (24:53-55).

With regards to claim 7, as recited in claim 1 wherein the instructions of the intermediate instruction set have a fixed length and do not cross code word boundaries (24:63-65, see aligning on byte boundaries).

With regards to claim 8, as recited in claim 1, wherein zero-address instructions of the instruction set of the target machine for pushing data onto a stack for use in a subsequent zero-address instruction operation are incorporated as explicit addresses into a new instruction in the intermediate instruction set for performing that operation, thereby reducing the number of different instructions in the intermediate instruction set (see table on the bottom of column 30 for allocating stack and zero address instruction).

Regarding claim 9 see reasoning in claim 1.

Regarding claim 10 see reasoning in claim 2.

Regarding claim 11 see reasoning in claim 3.

Regarding claim 12 see reasoning in claim 4.

Regarding claim 13 see reasoning in claim 5.

Art Unit: 2122

Regarding claim 14 see reasoning in claim 6.
Regarding claim 15 see reasoning in claim 7.
Regarding claim 18 see reasoning in claim 8.
Regarding claim 19 see reasoning in claim 1.
Regarding claim 20 see reasoning in claim 1.
Regarding claim 21 see reasoning in claim 3.
Regarding claim 22 see reasoning in claim 4.
Regarding claim 23 see reasoning in claim 5.
Regarding claim 24 see reasoning in claim 6.
Regarding claim 25 see reasoning in claim 7.
Regarding claim 26 see reasoning in claim 8.
Regarding, to claim 28 see reasoning in claim 3.
Regarding, to claim 29 see reasoning in claim 4.
Regarding, to claim 30 see reasoning in claim 6.
Regarding, to claim 31 see reasoning in claim 8.

Allowable subject matter

Claims 16, & 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

wherein the code translator runs as a user mode process under control of a host operating system on the host computer, and wherein the interpreter runs as a kernel mode driver thread under the host operating system.

wherein the emulation system may comprise multiple instances of the interpreter each running as a different thread in the kernel space of the host operating system.

Art Unit: 2122

Response to Arguments

Regarding rejection of the claims 1-15, &18-31 under 35 U.S.C. § 103(a), Examiner has evaluated applicant's arguments and Applicant's arguments with respect to claims 1-31 have been considered and overcome the previous rejection, however application still remains rejected over new art.

Correspondence Information

Any inquires concerning this communication or earlier communications from the examiner should be directed to Chuck O. Kendall who may be reached via telephone at (703) 308-6608. The examiner can normally be reached Monday through Friday between 8:00 A.M. and 5:00 P.M. est.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Greg Morse* can be reached at (703) 308-4789.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.

For facsimile (fax) send to 703-7467239 official and 703-7467240 draft
